## Technical Skills

**Strong:** JavaScript, React, Redux, ES6, Less, Sass, Babel, Webpack, Docker, jQuery, Bootstrap, HTML5, CSS3, Git  
**Experienced:** Angular, React Native, Node.js, Ruby, Google Analytics, Mixpanel, MailChimp, Sketch, Photoshop

## Professional Experience

Front-End Developer - [Postamo](#)

June, 2017 - Present

*A real estate marketing web app that connects 200,000+ agents with home sellers and buyers over social media.*

- Instrumental in complete overhaul of website from monolithic **jQuery/HTML** site to **React/Redux** app to enable near-real time event tracking of pages and posts for our power users.
- Ingest data from **Ruby on Rails - Restful Api** using **Redux**, promoting normalization of data.
- Daily code deployments to **AWS Elastic Beanstalk node.js** after environments tests and QA.
- Web analytics implementation using **Google Analytics** and **Mixpanel** to track agent and user behavior for every developed page allowing for more informed decisions.
- Develop objects models for API calls, Routes, Store Helpers, Profile Helpers for easy reuse of code.
- Collaborate with UX designers to create **Sketch/Zeplin** files and implement designs in **JSX** and **CSS**.
- Create and manage **MailChimp** and **Mandrill** email marketing campaigns to work across email clients.
- QA test front-end code in multiple browsers to ensure cross-browser compatibility.
- Involved in **Agile** process, weekly sprints, daily stand ups and **Pivotal** tickets to track App development.

Front-End Lead - [School2Career](#) | [github](#)

*Developed an app with a team of 4 to help students find the right college and career that matches their interests*

- Worked with **React.js** and **Redux** to create a responsive single page app with a team of 4 developers.
- Implemented **Google Maps API** populating individual schools while the user interacts with the map.
- Dynamically displayed data on over 7,000 schools with **reCharts.js** and images using **Google Places**.
- Collaborated with backend to make **Axios** calls to our **RESTful API** connecting with **MySQL Php**.
- Applied mobile first **Material Design** principles and made wireframes to create the **UX/UI** of the app.

Front-End Lead - [AfterShock](#) | [github](#)

*Led a team of 4 developers in the development of an earthquake tracker app*

- Designed app to retrieve real-time earthquake data and news from **USGS** and **Twitter** via **API Ajax** calls.
- Displayed earthquakes on **Google Maps** using **jQuery** selectors to populate according to magnitude.
- Applied mobile first responsive design practice using **Bootstrap** and **CSS**.

Front-End Developer - [ai Music](#) | [github](#)

*Built a **voice activated** music player designed to make finding music easier*

- Implemented **Annyang speech-to-text** artificial intelligence library based on users' voice. Play, Pause...
- Aggregated and displayed data on artists' top songs via **SoundCloud API** using **jQuery, HTML, CSS**.
- Displayed SoundCloud results using **Bootstrap** for visual style and responsive design.

Lighting Console Programmer - [Twentieth Century Fox](#)

2004-2016

- Programmed lighting cues and lighting designs for Avengers, Fast and the Furious 7, Moneyball, Thor...
- Managed teams of up to 15 people in logistics, expediting show setup and break down.

## Education

Full Sail University    Film and Cinematography

2004
